

INTERNSHIP AT A MULTILINGUAL KINDERGARTEN

REF. No. 1100

About us

The kindergarten is situated in one of Barcelona's most beautiful districts. It is a central but still quiet and save environment. This is the perfect place to enable the interns gaining insights into education and working with the children following the modern educational principles of this institution.

In globalizing environment, it is the objective of the kindergarten to raise the children as citizens of the world. They do that having initiated English and Dutch playgroups in which the children are being educated in one of these two languages. The staff is well-educated and native in English, Dutch or Spanish. Modern education principles are being applied and the well-being of the children is their top priority.

This kindergarten has been set up to provide an early-childhood bilingual surrounding for kids in which they can learn a second language naturally. The children are divided into two groups, one Dutch and one English group. Within these groups English or Dutch are the spoken languages so that the children will learn to understand the language and absorb it naturally. There is no time in life in which new languages can be acquired with as little effort as in early childhood. The educational principle of this kindergarten builds on that fact. Next to that also educational systems from Holland and England are being considered within the daily routines of the kindergarten which include: going to the park, handicrafts and playing individually and in groups.

Tasks

- communication with children in English or Dutch
- playing with the kids and initiating games
- helping the staff to take care of the kids
