

INTERN FOR CONSULTING COMPANY

REF. NO. 86

About us

The Consulting Company was established in New York in 1979. We are a research based consultancy operation and our work segments into four distinct (but overlapping) areas:

- Business Research, (Market Studies, Buyer Analysis, Competitor Analysis, and other Market and Business Development Studies)
- Business and Market Strategy and Planning Programmes
- Acquisition and Partnership Search Programmes
- Acquisition Due Diligence Studies

The Company is an independent operation and is owned by its Directors. Over twenty years we have established an excellent reputation with “Blue Chip” clients throughout the world. We have an active client list of several hundred operations, (and would provide references from any of these to a prospective new client). We are particularly well known as a specialist supplier of commercial due diligence to the London, New York and Hong Kong investment community – perhaps the most demanding client base for any research consultancy operation.

Number of employees

6
