

## ENGINEERING AND THE ENVIRONMENT

REF. No. 1258

### About us

Our company is committed to face the environmental issues of the world by creating realistic yet entirely new profit-based solutions. We are agile and shallow tier and expect all of our people to act and react as if the future of the planet is in their hands.

We are a combination of innovative development engineers, artists, business minds, designers and lawyers who have worked with the most technologically advanced companies on the planet.

Legally we are a London UK establishment, although that is for the purposes of company registration.

As having a fixed office space is wasteful and polluting, we are virtual, but if needed, we use a temporary space to meet. If not, it is all about Zoom/Skype and getting on with the job as a semi-autonomous agent of a larger entity.

If you are expecting to be told exactly how to solve a problem that we set for you then we will have already solved that problem ourselves.

We have created an entirely unique system which deals with some of the main environmental problems and would want you to work as an innovative and equal partner to develop those systems.

### Number of employees

2-20 depending on the tasks set

### Tasks

PLEASE NOTE: In order to protect our Intellectual Property, it is an absolute requirement that any successful candidate will be required to declare that they fully understand the details and implications of our Non-Disclosure Agreement and to then sign our Non-Disclosure Agreement.

After full briefing regarding each of the projects reach and depth the successful candidate should follow through on the following:

Rapidly and accurately respond to ongoing questions relating to 2d and 3d business presentations cited above from project personnel.

# PRAKTIKUM IN LONDON

Rapidly and accurately review the company's 2d and 3d business presentations and videos to date and produce insights on that work.

Rapidly and accurately design 2d and 3d business presentations and videos on a project by project basis for each project.

Rapidly and accurately redesign the company's website.

In conjunction with the people on each project ensure that your design insights are fully integrated into the daily, weekly and monthly project by project objectives.

Manage the day-to-day 2d and 3d business presentations and videos need of a fast-moving company in a friendly and creative manner.

Sit in on fast-moving digital meetings and provide 2d and 3d business presentations and video design insights during and after those meetings in a friendly and positive manner.

Pro-actively create innovative ongoing 2d and 3d business presentations and video design insights.

Produce 2d and 3d business presentations and video design and insight-based reports on demand for the company Founders regarding all of the ongoing company projects.

Actively and autonomously seek out new raw data that creates new aspects of 2d and 3d business presentations and video design and creation.

Actively seek out and suggest new ways of approaching the company's 2d and 3d business presentations and video needs and wants.

Be interested, engaged, creative and proactive at all times.

You will be given a great deal of autonomy and responsibility.

We expect you to use that autonomy and responsibility to create real and directly applicable innovation.

## Skills needed

Candidates should have a commercially workable knowledge of Power Point, Excel, InDesign and CFM software.

Candidates should have an ongoing and up to date interest and a commercially workable knowledge of current 3d design packages.

# PRAKTIKUM IN LONDON

Candidates should have an ongoing and up to date interest and a commercially workable knowledge of current video / film production equipment and editing software including FCP, Premiere and iMovie.

Candidates should be able to rapidly and at short notice produce commercially applicable business presentation videos that combine real time action and presenters, voiceovers and to be able to self-generate 2d and 3d graphics for those presentations.

Candidates should be able to rapidly and at short notice produce creative and succinct Power Point business presentation decks that combine self-generated 2d and 3d graphics that they originate themselves, business plan spreadsheets and other such presentation materials.

Candidates should be able to extrapolate highly creative “what if” feasibility scenarios throughout their individual potential work parameters and to be able to supply answers to those “what if” feasibility scenarios.

## **Duration of the internship**
