

## UK AND INTERNATIONAL LAW WITH SPECIFIC APPLICATIONS.

REF. No. 1262

### About us

Our company is committed to face the environmental issues of the world by creating realistic yet entirely new profit-based solutions. We are agile and shallow tier and expect all of our people to act and react as if the future of the planet is in their hands.

We are a combination of innovative development engineers, artists, business minds, designers and lawyers who have worked with the most technologically advanced companies on the planet.

Legally we are a London UK establishment, although that is for the purposes of company registration.

As having a fixed office space is wasteful and polluting, we are virtual, but if needed, we use a temporary space to meet. If not, it is all about Zoom/Skype and getting on with the job as a semi-autonomous agent of a larger entity.

If you are expecting to be told exactly how to solve a problem that we set for you then we will have already solved that problem ourselves.

We have created an entirely unique system which deals with some of the main environmental problems and would want you to work as an innovative and equal partner to develop those systems.

### Number of employees

2-20 depending on the tasks set

### Tasks

PLEASE NOTE: In order to protect our Intellectual Property, it is an absolute requirement that any successful candidate will be required to declare that they fully understand the details and implications of our Non-Disclosure Agreement and to then sign our Non-Disclosure Agreement.

After full briefing regarding each of the projects reach and depth the successful candidate should follow through on the following:

Rapidly and accurately respond to ongoing questions relating to Law as cited above from project personnel.

# PRAKTIKUM IN LONDON

Rapidly and accurately review the company paperwork and produce Law-based insights on that paperwork.

Rapidly and accurately produce insights based in Law regarding potential licensing agreements.

In conjunction with the people on each project ensure that those daily, weekly and monthly objectives are met within the framework of the Law.

Manage the day-to-day legal needs of a fast-moving company deadlines in a friendly and creative manner.

Sit in on fast moving digital meetings and provide Law based insights during and after those meetings in a friendly and positive manner.

Produce Law based reports on a demand based for the company Founders regarding all of the company projects.

Pro-actively create innovative ongoing insights.

Be interested, engaged, creative and proactive at all times.

You will be given a great deal of autonomy and responsibility.

We expect you to use that autonomy and responsibility to create real and directly applicable innovation.

## **Skills needed**

Candidates should have a workable understanding of general UK and International Law.

Candidates should have a workable understanding of UK and international shipping law.

Candidates should have a workable understanding of UK and international contract law.

Candidates should have a workable understanding of UK and international intellectual property law.
